

Environmental Policy

Environmental Policy

SiamEast Solutions Public Company Limited

SiamEast Solutions Public Company Limited prioritizes and acknowledges its responsibility toward society in environmental matters. The company adheres to relevant environmental laws as a foundation for its operations and establishes an environmental policy that encourages employees and stakeholders to participate in environmental management. The principles and practices are as follows:

1. Control, Prevent, and Mitigate Pollution: Minimize environmental impact from water pollution, hazardous waste, chemicals, noise, and other pollutants in strict compliance with laws, regulations, and environmental commitments.

2. Continuous Improvement of Environmental Quality: Enhance wastewater treatment and energy conservation continuously.

3. Waste Reduction through the 3Rs Principle: Implement Reduce, Reuse, and Recycle practices to minimize waste generation.

4. Conserve Resources and Energy: Reduce electricity and water consumption and use materials efficiently within the company

5. Promote Environmental Awareness: Foster knowledge, understanding, and consciousness among employees regarding environmental protection and safety through communication and training on environmental management.

SiamEast Solutions Public Company Limited is committed to supporting various resources, including budget and other necessary elements, to enhance environmental operations both within and outside the company.
